

THE TRUE CEILING EDITION

GoalOS α -AGI Ascension

SOVEREIGN RESERVE Ω

INSTRUMENT 20

AMENDMENT & EVOLUTION PROCESS

How the institution improves without becoming ungoverned

Upgrade proposals, constitutional invariants, equal-budget benchmarks, canaries, challenge windows, delayed outcomes, rollback, and versioned adoption.

From Open-Ended Intelligence to Kardashev Type I Civilization

PROOF-GATED AUTONOMY • VERIFIED CAPABILITY • COMPOUNDING CAPACITY

FOUNDING RELEASE Ω -2.0 • JULY 2026

CONSTITUTIONAL POSITION

Mandate, Authority, and Boundary

How the institution improves without becoming ungoverned

A candidate improvement is not an upgrade. It is a hypothesis that must earn a proof-backed right to propagate.

Purpose

Govern amendments to charters, policies, schemas, models, agents, routing, evaluators, contracts, economic parameters, graph rules, and capacity-allocation mechanisms.

Authority

Defines proposals, bonds, incumbents, benchmarks, constitutional invariants, review, canaries, monitoring, challenge, delayed outcome, rollback, and versioned adoption.

Boundary

Novelty, executive sponsorship, token vote, benchmark gain, code merge, or model confidence cannot bypass proof, rights, safety, transfer, and rollback requirements.

No proof, no evolution. No evaluation, no propagation. No rollback, no release.

OPERATING CONSTITUTION

Six Non-Negotiable Laws

The framework remains legible under speed, scale, novelty, and pressure.

Freeze the incumbent

Every proposal identifies the exact current state, dependencies, costs, risks, and restoration target.

Test under equal constraints

Candidate and incumbent receive comparable data, tools, budgets, environments, evaluators, and stopping rules.

Preserve constitutional invariants

Private intelligence, role separation, evidence gates, challenge, safety, rights, and rollback cannot be silently weakened.

Canary progressively

Probe, 1%, 5%, 25%, controlled, and broad stages require distinct evidence and stop conditions.

Observe delayed outcomes

Immediate scores cannot substitute for persistence, transfer, downstream effects, and real operating cost.

Version every authority state

Proposal, review, decision, rollout, incident, rollback, supersession, and current version remain auditable.

INSTITUTIONAL MACHINERY

Objects, Lifecycle, and Decision Gates

The operating surface converts policy into attributable state transitions.

Does the candidate improve future verified capability under equal constraints without weakening constitutional protections or creating unrecoverable dependence?

BOARD CONTROL

Metrics, Failure Modes, and the First 90 Days

Measure the institution by evidence, attributable value, and reversible authority.

BOARD METRICS

01

Upgrades passing equal-budget benchmarks

02

Canaries stopped or promoted by mechanical thresholds

03

Rollback rehearsal and success

04

Metaproductivity and Mission 2 improvement

PRINCIPAL FAILURE MODES

01

Benchmark gain masking safety loss

02

Self-modification of its own evaluator

03

Canary scope silently expanded

04

No reliable incumbent or restoration path

FIRST 90 DAYS

Adopt proposal schema • Freeze constitutional invariants • Run one upgrade benchmark • Rehearse rollback

BOARD RESOLUTION: Adopt the Amendment & Evolution Process and prohibit direct production modification outside proof-backed upgrade rights.
