

THE TRUE CEILING EDITION

GoalOS α -AGI Ascension

SOVEREIGN RESERVE Ω

INSTRUMENT 17

COMMUNICATIONS & TRANSPARENCY FRAMEWORK

Claim maturity, disclosure, and institutional trust

Evidence-status vocabulary, public-private boundaries, source lineage, reviewer communication, incident disclosure, corrections, and publication controls.

From Open-Ended Intelligence to Kardashev Type I Civilization

PROOF-GATED AUTONOMY • VERIFIED CAPABILITY • COMPOUNDING CAPACITY

FOUNDING RELEASE Ω -2.0 • JULY 2026

CONSTITUTIONAL POSITION

Mandate, Authority, and Boundary

Claim maturity, disclosure, and institutional trust

The public narrative must never outrun the evidence state.

Purpose

Govern internal and external claims, evidence-status vocabulary, source lineage, publication, investor and partner communications, reviewer findings, incidents, corrections, and archives.

Authority

Defines who may publish, required substantiation, claim maturity, prohibited wording, disclaimers, citation, review, versioning, corrections, and crisis communication.

Boundary

Transparency does not require disclosing private intelligence, confidential data, security-sensitive details, trade secrets, privileged advice, or information restricted by law or contract.

Publish the strongest statement the evidence supports - and no stronger.

OPERATING CONSTITUTION

Six Non-Negotiable Laws

The framework remains legible under speed, scale, novelty, and pressure.

Label evidence state

Specified, implemented, simulated, testnet, externally reviewed, measured, production, and retired are not interchangeable.

Separate vision from fact

Scenario horizons, modeled value, architecture, and empirical outcomes occupy distinct sections and language.

Cite primary lineage

Material technical, legal, economic, and scientific claims link to their controlling source and version.

Preserve blocked claims

Public summaries identify what remains conditional, rejected, disputed, stale, or excluded.

Correct visibly

Errors and superseded claims receive versioned correction, not silent deletion.

Protect sensitive layers

Public commitments may prove state while confidential intelligence remains selectively disclosed.

INSTITUTIONAL MACHINERY

Objects, Lifecycle, and Decision Gates

The operating surface converts policy into attributable state transitions.

Claim Register

Claim, evidence state, source, owner, approver, audience, expiry, correction, and prohibited variants.

Publication Packet

Source snapshot, Docket references, review comments, approvals, hashes, release notes, and archive.

Incident Communication Plan

Facts known, unknown, affected parties, confidentiality, legal hold, correction cadence, and spokesperson.

Could an informed reader distinguish vision, architecture, simulation, deployed state, external evidence, and realized outcomes without inference or hype?

BOARD CONTROL

Metrics, Failure Modes, and the First 90 Days

Measure the institution by evidence, attributable value, and reversible authority.

BOARD METRICS

01

Public claims with current evidence labels

02

Material claims with primary source lineage

03

Correction latency and archive completeness

04

Incidents communicated within approved cadence

PRINCIPAL FAILURE MODES

01

Grandiosity obscuring evidence boundaries

02

Marketing terms presented as legal conclusions

03

Silent edits or missing version history

04

Over-disclosure of sensitive methods or data

FIRST 90 DAYS

Create claim register • Publish evidence vocabulary • Adopt release workflow • Audit top 25 public claims

BOARD RESOLUTION: Adopt the Communications & Transparency Framework and require claim maturity to remain synchronized with evidence maturity.
